Official Whitepaper For \$DSC Project

Introduction

Dstarlights Coin \$DSC is a BSC defi token aimed at Revolutionalising Digital Assets, creating custom Virtual Coin Cards for Diverse blockchain and industries, customised NFTs, building arcade games, and providing charity donations etc.

Core Values

We're creating real time premium cards that will be integrated with airports, train stations, seaports, hotels and online shopping stores in order to ease the hassles of sorting for Exchanges during online payments and transactions. With a custom made \$DSC VCC you can travel the world with absolutely no need for extra luggages, you have everything optimised in your card. Just like hotel doors will open once you slot in your card, you can have access to multipurpose travels round the world via any means of transportation with just a custom made \$DSC VCC.

Official Whitepaper For \$DSC Project

Why A Virtual Coin Card

With the global trend and mass adoption of crypto currency and digital assets taking over the financial institutional systems, the dominance of Fiat currency will soon be done away with. We step into the future; Revolutionalising digital assets, which is the core foundation for a premium customised coin card. This will aid your payments or purchases without the need to seek for or use a merchant.

The \$DSC VCC is based on open source files, but heavily modified by the Developer in order to expand the services to different blockchains such as Cardano (ADA), Dogecoin (DOGE) Litecoin (LTC) and many more.

What VCC Will Do

\$DSC Virtual Coin Card solves the burden of seeking for a merchant every now and then to convert your crypto funds to Fiat currency for online trades and payments, \$DSC VCC optimises a function that enables your token to be converted to real cash and then used to make online payments and purchases using the inbound currency in the dashboard.

Further Long Term Plan For \$DSC

Dstarlights Coin aims to be one of the global sellers of Customised NFTs which can be shipped to our holders and users to and from any part of the world. With our powerful partnership with the finest E-commerce stores, we aim to be globally recognized as a one of its kind creator of a Virtual Coin Card providing free custom cards to blockchain industries, charities, famous influencers and organisations. \$DSC plans to launch a \$DSC Wallet app where you can manage your Virtual Coin Card in the different blockchain the \$DSC VCC supports.

The VCC will be built and hosted on its dedicated server equipped with the best computing power for Constant and multiple operations which will be implemented, making sure the high standards for the project are met, while keeping the service cost efficient against rental prices.

\$DSC will also launch its own Premium Merchandise made with high quality materials, such as jewelleries, premium wallet gadgets and with a possibility of using its own trading card in the future, partnering with our home company and other digital companies to deliver and ship these products across the world to our esteemed investors, customers and users.

Official Whitepaper For \$DSC Project

What Makes \$DSC Unique

A project like this has never been done. \$DSC is the unique idea that screams LUXURY, FANCY SOPHISTICATION, HIGH CLASS AND STYLE, a core feature of our already in place multi-purpose online store (Dstarlights.com). \$DSC VCC will automatically be integrated and ready to use once our NFTs market place goes LIVE.

The Different Categories Of VCC:

Each of these categories have inbuilt functionalities to interact accordingly to it's specific blockchain permissions. Once you purchase and Activate your \$DSC VCC, you will get from us absolutely free a custom NFT of your choice. This gives you access to trade or sell on the \$DSC market place. All the \$DSC VCC categories will have a representative Gem tag as NFTs where the serial number will be the address correlated to the card. So not only will you trade with it, you will be given access to our launchpad to promote your businesses. Keep in mind that all the trades are restricted.

When generating the \$DSC VCC, it will apply to the Gems (NFTS).

How The VCC Works

The generation of the Virtual Coin Card is simple and SAFE.

In order to use one, you have to purchase and Activate the \$DSC VCC, using three simple steps

1. Purchase your preferred \$DSC VCC

- Log in and Generate your own codes
 - You only need this generated code and your preferred TOKEN CA to synchronize your card
- SAVE EVERYTHING IN A SAFE PLACE.**

2. Input your generated code and preferred crypto CA, symbol and decimal.

3. ACTIVATE AND LAUNCH

- Now you're ready for trading and good to go.

Community Drive And Impact

\$DSC being a huge and strong Community token, we will bond intensively with numerous communities and partner with charity firms, as our aim is to further reach out and solve the growing needs of humanity. In our quest to facilitate a strong Community surge, we will set apart 20-30% revenues generated from our NFT MARKET PLACE, which will be used to fund humanitarian services such as charity donations, scholarship programs, healthcare services etc.a

\$DSC Staking System

With this being a full fledged Investor reward Project, we have set out a good percentage of tokens to reward all holders who are willing to take on this journey with us, with some heavyweight staking rewards that will be worth a fortune in no time, we look to carve out a name for ourselves as a strong Community project that rewards all strong holders and believers.

Marketing Plans For \$DSC

\$DSC will research and hire a professional Marketing agency aimed at crypto currencies and ICOs only. We believe the impact that a professional Marketing agency can bring to the \$DSC project is way higher compared with what the team can achieve alone.

\$DSC Tokenomics

Total Supply: 10 Trillion \$DSC

Staking Rewards	Gaming Rewards	Marketing/Exchange Listings	Dev. Wallet	Advisory/partnerships	VCC Ecosystem
15%	16%	8%	5%	4%	2%

\$DSC Marketing Wallet

Marketing is a big thing, and has a huge impact on the \$DSC project. With funds in the Marketing wallet \$DSC will be able to be listed on Bitmart, P2PB2B, IndoEx, Coinsbit, ProBit etc without any problems, occasionally Airdrop Community members for hard work, as well as keeping a strong promotional surge that inturn opens us the more to reaching potential investors, this will create a huge FOMO and a strong buy pressure, thereby increasing holders and market cap.

\$DSC Dev Wallet

This is a full time work and part time jobs for the MODs. Dev wallet will cover a monthly salary for our team, from the MODs to the Dev, and also pays the team work for the project. We believe no one should work for free (or even pay to work).

Dstarlights Coin \$DSC

Revolutionalising Digital Assets.

Official Whitepaper For \$DSC Project

\$DSC Trading Taxes

\$DSC carries a **12% Buy Tax** and **15% Sell Tax** which is splitted into - Reflections to holders - Burn - Auto LP - Marketing/Server Development. The reflections are to encourage our investors to hold, as we take a moonshot, and the burn rate is so the supply of \$DSC is limited over time thereby increasing the worth of \$DSC, the percentage (%) added to Liquidity is so we continue to keep a steady floor for constant growth and the percentage (%) sent to marketing and server Development is so we constantly have funds when we begin our hunt to be listed on major exchanges, as well as further Project developments such as building our custom wallet, apps, games, servers and maintaining them.

\$DSC Anti-Whale Anti-Dump Mechanism

This being a long term project our aim is to guarantee a stable rise in chart hence, Hodlers who hold upto 0.8% of \$DSC will have a MAX SELL AMOUNT of 10% \$DSC every 24hrs. This is put in place to rid off every single possible attack or market manipulation that could cause a not interesting chart. With this implemented our chart will continually look clean and green welcoming potential and new investors.

\$DSC VCC Core Utility

With the world turning on to digital assets, our first major project will be to build a Virtual Coin Card..

This card will be used the same way the credit card is used but this time with crypto currency. There are five categories, each category has its premium features. The highest category will have a feature that enables its holder hold tokens with different blockchains in it.

Dstarlights Coin \$DSC

Revolutionalising Digital Assets.

\$DSC VCC Smart Idea:

Just like you have a credit card and you use your local currency to make payments or purchase an item on an online store; when you fill in your card details, it takes the equivalent value of your local currency and pays the online store in dollars (\$) same way the virtual coin card works.

Assume you hold BTC, ETH, BNB, DSC etc on that card, and you want to make payments for an item and maybe you're short of funds and you don't really have time to seek an Exchanger, all you have to do is use the token you have on the card to make direct payment, and the card automatically converts your BNB, ETH, BTC, DSC and pays the online store in dollars (\$) straightaway. This is also applicable when you want to send funds to friends, family, business associates and any online fund transfers you can think of, all by using just your Cryptos.
